2. USE OF COOKIES AND WEB BEACONS

We use cookies and other technology to deliver our Services; tailor your experience; and deliver customized advertising to you. A cookie is a small text file stored on your device to personalize your experience, recognize repeat visitors, and deliver Services efficiently.

We use web beacons, also known as pixel tags or clear GIFs, to help us track website traffic, measure advertising effectiveness, and customize users' online experiences. Web beacons are small, transparent graphic images placed on a web page or in an email and are used to monitor the activity of the user accessing that web page or email. The beacons collect information automatically, monitor and improve how our Services are used, and deliver advertising, as we rely primarily on advertising revenue to deliver our Services.

We will continue to add new technology to our Services, which may collect information about you and your use of our Services.

- **How to disable cookies.** You may configure your browser to reject cookies. If you do so, you might not be able to automatically log-in to your account, access important functions, features and activities or enjoy certain conveniences or customized and personalized features of our Services.
